# All Patients Safe

## Suicide Prevention Training for Medical Professionals in Alaska

### Suicide is a silent epidemic and public health crisis

In the US, suicide is **a more common cause of death** than breast cancer, prostate cancer, or traffic fatalities.

In 2014 the rate of Alaska Native males that died by suicide was nearly **four times** the national average.

**All Patients Safe** provides the necessary tools to medical providers to understand their role in suicide prevention by teaching them how to:

- Integrate screening and assessment tools into their practice
- Educate patients on keeping homes safe
- Refer patients to additional resources
- Follow up with those at risk for suicide

### Medical professionals can make an enormous impact

#### Each self-paced training module includes:

- Real patient stories
- Model provider-patient interactions
- Interactive patient exercises with feedback

**3 or 6 hours of complimentary CME and CNE credits available**  
(see reverse for details)

Distributed in partnership with:

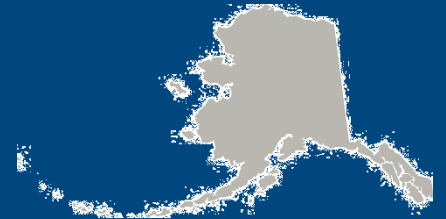

THE ALASKA  
TRAINING  
COOPERATIVE

With questions or to register, please email:

Learn more about the Northwest MHTTC at:  
**[www.mhttcnetwork.org/northwest](http://www.mhttcnetwork.org/northwest)**

Suicide is the  
**#1** cause of death  
for Alaskans aged  
10-64 years.

Alaska has the  
**2nd** highest  
suicide rate in  
the United States.

**50%** of all people  
who die by  
suicide see a primary  
care provider in the  
month prior to  
their death.
